

Reception – Home Learning Week 1 23.03.2020

Please look on Tapestry daily as there will be a Maths and English activity to be completed each day.

In addition to this we would like you to read/share a book with someone else for at least 15 minutes and choose one other activity from this grid to do. Activities can be recorded in any way you wish in your Home Learning books/on Tapestry/on paper, whichever is easiest for you.

Super Cars!

The owner of the local garage has asked the children for help. She wants to build a new type of vehicle but needs some designs to choose from. The design must include: to be able to carry 4 passengers, able to travel over land, water or in space, have a special power. Draw and label your supercar!

Science Investigation

Make a homemade ramp and use toy vehicles to test it. How can you make the vehicle go faster? Can you measure how far your vehicle travels? Investigate.

Computing

Log onto Purple Mash and enter 'Mini Mash'. Click on the Gingerbread Man hanging on the washing line and use the paint programme to design and create a Gingerbread Man.

My gingerbread man is called Fred

Create a name for your home school. Create a badge for your home school. Ours has people and trees on it, what would yours include?

Decorate your home school workbook.

You could draw pictures, cut out pictures from magazines, put your home school logo on

the front.

Your own idea.
