

We would like you to **try** to choose **one** activity from this grid to do each day.

<p>How can we protect our planet? Watch this clip www.bbc.co.uk/cbbc/watch/bp-the-lorax-green-tips?collection=green-planet Discuss the 5 ways to help protect the planet and then write them down in your books.</p>	<p>Art - practical activity</p> <p>Choose a theme for a poster about helping our planet. Add a message in words about how to protect the planet. For example: Protect the ocean, recycle plastic, help our turtles etc. Make your message bold and short and include illustrations too.</p>	<p>Turn it off</p> <p>Look at devices around your house. Turn off lights when you leave a room and check if any devices can be unplugged when you are finished with them too.</p>
<p>Science activity</p> <p>Research the importance of trees. This can include what food and resources they provide us with, how they give us oxygen, absorb carbon dioxide (which is leading towards climate change), habitat and shelter to animals, food for animals, calming place for humans to go, help against flooding with root systems. Create a poster using pictures and information to show how important they are. Remember to include lots of facts. Make it look really nice and easy to read.</p>	<p>DT - practical activity</p> <p>Raid your recycling bin. I would like you to design and make a character/bug creature of your choice using the recycled materials. You may use other resources you have at home too to make it look really nice. Draw a design and label what you will use for each part. Then make your model using the recycled materials. Take a photo of your labelled design and completed model.</p>	<p>DT practical activity</p> <p>To help save our planet we need to be less wasteful. We can start by not wasting food at home. Look in your fridge and cupboards at home. Think of a recipe to make using either leftovers or food that is nearly out of date and make a meal/dish. Eg stale bread for bread and butter pudding, vegetables for a soup, left over chicken from a roast to make into a curry or pie, left over vegetables for bubble and squeak etc.</p>
